

Ashwagandha + Shilajit Gummies Market Report

Executive Summary

The Ashwagandha + Shilajit gummies market represents a growing segment in the functional supplement space, combining two powerful adaptogenic ingredients in a convenient, consumer-friendly format. These products target energy, stress management, and overall vitality concerns. Key players include Be Bodywise, Wellgard, Novomins, and What's Up Wellness, with products ranging from \$25-60 per bottle. Most formulations combine Himalayan shilajit (rich in fulvic acid and 85+ trace minerals) with KSM-66 or standard ashwagandha extracts. The market shows strong growth potential driven by increasing consumer preference for natural energy solutions and the convenience of gummy formats over traditional capsules or powders.

Quick Answers

What can be found on it?

Products typically contain Himalayan shilajit extract (200-2000mg), ashwagandha root extract (300-1000mg), fulvic acid, 85+ trace minerals, and supporting ingredients like vitamin B12, ginseng, and turmeric. Most are vegan, non-GMO, and lab-tested for purity.

What is it good for?

- Natural energy and stamina support without caffeine crashes
- Stress management and adaptogenic benefits
- Immune system support
- Enhanced workout recovery and performance
- Cognitive function and focus improvement
- Overall vitality and wellness

Why do we need it?

Modern lifestyles create energy deficits and stress-related health challenges. These gummies provide a convenient alternative to multiple supplements, combining ancient Ayurvedic ingredients in a format that's easier to consume than traditional resin or powder forms. They address the growing demand for natural, stimulant-free energy solutions.

Deep Dive

Feature	Details	Source

Table 2 – Capabilities

Product	Shilajit Content	Ashwagandha Content	Additional Adaptogens	Processing
Be Bodywise	Gold-grade, 85+ minerals	KSM-66 type	Gokshura	Lab-tested, heavy metal free
Wellgard	Fulvic acid rich	Standard extract	None specified	Third-party tested
Novomins	2000mg Himalayan	Standard extract	Chaga mushroom	NSF/GMP certified
What's Up Wellness	200mg + gold dust	Standard extract	Black Musli, Ginger	Traditional preparation

Table 3 – Ecosystem

Product	Additional Vitamins	Certifications	Manufacturing Location
Be Bodywise	Not specified	Lab-tested, Non-GMO	Not disclosed
Wellgard	B6, B12, Zinc	Third-party tested	UK
Novomins	Not specified	NSF, GMP, Vegan	Not disclosed
What's Up Wellness	Not specified	Not specified	India

Table 4 – Commercials

Product	Pricing	Free Tier/Trial	Limitations
Be Bodywise	\$40-50/60 gummies	No free trial	Amazon only
Wellgard	\$30-40/60 gummies	No free trial	UK shipping focus
Novomins	\$35-45/90 gummies	No free trial	Limited availability
What's Up Wellness	\$25-35/bottle	No free trial	India-focused

Decision Guide

By Persona:

- **Fitness Enthusiasts:** Novomins (2000mg shilajit, stimulant-free energy)
- **Budget-Conscious:** What's Up Wellness (traditional formulation, lower cost)
- **Premium Quality Seekers:** Be Bodywise (gold-grade, lab-tested, sugar-free)
- **UK/EU Customers:** Wellgard (local brand, B-vitamin enhanced)
- **Health-Conscious:** Novomins (vegan, NSF certified, comprehensive testing)

Red Flags:

- Pregnancy/lactation (not recommended for any product)
- Medication interactions (consult healthcare provider)
- Unrealistic energy claims or overnight results promises
- Lack of third-party testing or certifications
- Products with excessive added sugars or artificial ingredients

Implementation Tips

Scenario	Tip	Why It Matters
First-time Users	Start with 1 gummy daily for first week	Assess individual tolerance and response
Athletes	Take 30 minutes before workout	Optimize energy and stamina benefits
Stress Management	Consistent daily timing (morning preferred)	Adaptogens work best with regular use
Quality Verification	Check for COA (Certificate of Analysis)	Ensures purity and potency claims
Storage	Keep in cool, dry place	Maintains gummy texture and ingredient stability
Medication Users	Consult healthcare provider first	Prevent potential interactions
