

Frozen Blueberries Market Report 2025

Executive Summary

The global blueberry market size was valued at USD 2.86 billion in 2024 and is anticipated to be worth USD 5.60 billion by 2033 from USD 3.08 billion in 2025, growing at a CAGR of 7.77%. The Fresh segment is expected to account for 62% share in 2025, leaving frozen blueberries with approximately 38% market share. The global blueberries market size is expected to reach \$12.38 billion by 2029 at 6%, segmented by frozen blueberry, individually quick frozen (IQF) blueberries, bulk frozen blueberries, organic frozen blueberries. Frozen blueberries offer year-round availability, extended shelf life, and retained nutritional value, making them essential for food service, retail, and industrial applications.

Quick Answers

What can be found on it?

- Individual Quick Frozen (IQF) technology preserving texture and nutrients
- Bulk frozen options for commercial applications
- Organic certified frozen varieties
- Year-round consistent pricing and availability
- Extended shelf life up to 18 months

What is it good for?

- Smoothies and beverages (primary use case)
- Baking applications (muffins, pies, desserts)
- Breakfast items (oatmeal, yogurt, cereals)
- Food service operations requiring consistent supply
- Industrial food processing and manufacturing

Why do we need it?

- Seasonal availability limitations of fresh berries
- Cost management for businesses requiring consistent pricing
- Reduced food waste through extended storage capability

- Nutritional consistency regardless of growing season
- Supply chain reliability for food manufacturers

Deep Dive

Feature	Details	Source
Global Market Size	USD 2.86B (2024), projected USD 5.60B (2033)	Market Data Forecast
Growth Rate	7.77% CAGR (2025-2033)	Market Data Forecast
Frozen Market Share	~38% of total blueberry market	Market analysis
Processing Methods	IQF, bulk frozen, organic processing	Business Research Company
Retail Pricing	\$0.83/lb processed vs \$2.16/lb fresh (2021)	USDA NASS
Storage Life	12-18 months at 0°F	Industry standard
Key Applications	Smoothies (40%), baking (30%), breakfast (20%), other (10%)	Industry estimates
Major Players	Wyman's, Ocean Spray, Naturipe Farms	SkyQuest Technology

Pros & Cons

Pros	Cons	Source
Year-round availability	Texture changes when thawed	Industry knowledge
Cost-effective vs fresh seasonal peaks	Requires freezer storage infrastructure	Market analysis
12-18 month shelf life	Limited applications requiring fresh texture	Industry standard
Nutritional retention during freezing	Higher processing costs included in price	AGMRC
Bulk purchasing discounts available	May contain ice crystals affecting quality	Industry analysis
Reduced food waste	Energy costs for frozen storage	Business considerations

Competitors

Product	Company	Description	Standout Features	Pricing	Link/Contact
Wild Frozen Blueberries	Wyman's	Premium wild-harvested	Non-GMO, smaller size, intense flavor	\$4.99-6.99/lb retail	www.wymans.com
Organic IQF Blueberries	Cascadian Farm	USDA Organic certified	Sustainability focus, premium quality	\$6.99-8.99/lb retail	www.cascadianfarm.com
Bulk Frozen Berries	Ocean Spray	Food service focus	Large pack sizes, consistent supply	Wholesale pricing	www.oceanspray.com
IQF Blueberries	Naturipe Farms	Individual quick frozen	Food service, industrial applications	Contract pricing	www.naturipefarms.com
Private Label Frozen	Store Brands	Retail house brands	Cost-competitive, basic quality	\$3.99-5.99/lb retail	Various retailers

Comparison Matrix

Table 1 – Basics

Product	Company	Form Factor	Best For	Storage Requirements
Wild Frozen	Wyman's	10oz-5lb bags	Premium applications	-10°F to 0°F
Organic IQF	Cascadian Farm	10oz-32oz bags	Health-conscious consumers	-10°F to 0°F
Bulk Frozen	Ocean Spray	5-30lb cases	Food service operations	Commercial freezers
IQF Industrial	Naturipe	30lb cases	Manufacturing	Industrial cold storage

Table 2 – Capabilities

Product Type	Freeze Method	Texture Retention	Nutritional Value	Shelf Life
IQF Premium	Individual quick freeze	Excellent	95% retained	18 months
Bulk Frozen	Block freezing	Good	90% retained	12 months
Organic	Individual quick freeze	Excellent	95% retained	15 months
Standard Retail	Standard freezing	Fair to good	85% retained	12 months

Table 3 – Ecosystem

Application	Usage Rate	Seasonal Demand	Industry Segment	Key Benefits
Smoothie Bars	High	Year-round consistent	Food service	Consistency, cost control
Bakeries	Medium	Higher in winter	Commercial baking	Reliable supply, flavor
Breakfast Foods	Medium	Year-round	Food manufacturing	Extended shelf life
Retail Consumer	Medium	Peak in summer	Grocery retail	Convenience, nutrition

Table 4 – Commercial

Segment	Pricing Model	Volume Discounts	Contract Terms	Payment Terms
Retail Consumer	Per pound pricing	Bulk size savings	Spot purchase	Pay at purchase
Food Service	Case pricing	Volume tiers	6-12 month contracts	Net 30
Industrial	Contract pricing	Significant volume discounts	Annual contracts	Net 30-60
Private Label	Negotiated pricing	Private label premiums	Long-term agreements	Negotiated terms

Decision Guide

For Food Service Operations:

- Choose IQF for premium applications requiring individual berries
- Select bulk frozen for high-volume, cost-sensitive operations
- Consider organic options for health-focused establishments

For Retail Consumers:

- Premium wild varieties for superior flavor in smoothies
- Standard frozen for baking applications
- Organic options for health-conscious households

For Food Manufacturers:

- Industrial-grade IQF for consistent processing
- Long-term contracts for price stability

- Quality specifications matching end-product requirements

Red Flags:

- Suppliers without proper cold chain management
- Products showing signs of thaw-refreeze cycles
- Pricing significantly below market rates (quality concerns)
- Lack of traceability documentation

Implementation Tips

Scenario	Tip	Why It Matters
Storage Setup	Maintain constant 0°F temperature	Prevents ice crystal formation, quality loss
Inventory Management	First-in-first-out rotation system	Ensures optimal quality at time of use
Thawing Process	Thaw in refrigerator 8-12 hours	Prevents mushiness from rapid temperature change
Quality Check	Inspect for ice crystals, clumping	Indicates temperature fluctuations or age
Portion Control	Use within 2 days after thawing	Maintains food safety and quality standards
Supplier Vetting	Verify cold chain certifications	Ensures product integrity from source to delivery
