

Comprehensive Analysis: Eucerin Sun Body Sensitive Protect Spray SPF 50+

Product Overview

Product Information	Details
Brand	Eucerin (by Beiersdorf AG)
Product Line	Sun Protection / Sensitive Protect
Product Type	Body Sunscreen Spray
SPF Rating	50+ (Very High Protection)
Size	200 ml
Packaging	95% recycled plastic bottle with spray dispenser
Target Skin Type	Sensitive skin
Category	Medical Skincare

Protective Technology

Sun Protection Factor (SPF 50+)

SPF 50+ provides extremely high protection against UVB rays, blocking approximately 98% of UVB radiation. This level of protection is particularly important for sensitive skin types and for extended sun exposure.

Advanced Spectral Technology

The product features Eucerin's proprietary Advanced Spectral Technology which offers:

- Broad-spectrum UVA/UVB protection:**
 - UVB protection (responsible for sunburn) with SPF 50+
 - UVA protection (responsible for premature aging) that exceeds EU recommendations
 - UVA/UVB ratio $\geq 1/3$ as required by EU standards
- HEVIS (High Energy Visible Light) Defense:**
 - Protection against blue light (high-energy visible light)
 - Blue light can penetrate deeper into the skin than UV rays

- Can contribute to photo-aging and hyperpigmentation
- HEVIS defense is particularly important for those concerned about hyperpigmentation

Water Resistance

The product is labeled as "Extra water resistant," which means it maintains effective protection even after swimming or sweating. According to EU standards, "extra water resistant" products must retain their protective effect after 80 minutes in water.

Complete Ingredient Analysis

Ingredient	Function	Benefits	Potential Concerns
Aqua (Water)	Solvent, carrier	Base for the formulation; hydrating	None - essential ingredient
Alcohol Denat	Solvent, penetration enhancer	Improves spreadability; creates lightweight texture; quick-drying; antimicrobial properties	Can be drying or irritating for very dry or sensitive skin; may cause stinging if applied to damaged skin
Butylene Glycol Dicaprylate/Dicaprate	Emollient	Improves spreadability; enhances texture; non-greasy skin conditioning	Generally well-tolerated; minimal concerns
Butyl Methoxydibenzoylmethane (Avobenzone)	UVA filter	Excellent UVA protection; one of few filters effective against longer UVA wavelengths	Can be unstable unless paired with stabilizers (formula addresses this); potential allergen for some individuals
Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine (Tinosorb S)	Broad-spectrum UV filter	Highly photostable; enhances overall UV protection; stabilizes other filters; low irritation potential	Generally well-tolerated; minimal concerns
Ethylhexyl Triazone (Uvinul T 150)	UVB filter	Highly effective UVB protection; extremely photostable; requires lower concentration than other filters	Generally well-tolerated; minimal concerns
C12-15 Alkyl Benzoate	Emollient, solubilizer	Helps dissolve UV filters; improves texture; lightweight skin feel	Generally well-tolerated; minimal concerns
Caprylic/Capric Triglyceride	Emollient	Derived from coconut oil and glycerin; conditions skin; enhances barrier function	Generally well-tolerated; minimal concerns
Dibutyl Adipate	Emollient, solvent	Creates lightweight, non-greasy texture; improves spreadability	Generally well-tolerated; minimal concerns
Diethylamino Hydroxybenzoyl Hexyl Benzoate (Uvinul A Plus)	UVA filter	Excellent UVA protection; highly photostable; complements Avobenzone	Generally well-tolerated; minimal concerns
Phenylbenzimidazole Sulfonic Acid (Ensulizole)	UVB filter	Water-soluble UVB filter; helps reduce greasy feel;	Potential for rare allergic reactions; may increase free

Ingredient	Function	Benefits	Potential Concerns
		effective against shorter UVB wavelengths	radical production unless paired with antioxidants (formula addresses this)
Copernicia Cerifera Cera (Carnauba Wax)	Thickener, film former	Provides water-resistance; forms protective barrier; plant-derived	Generally well-tolerated; minimal concerns
Hydrogenated Rapeseed Oil	Emollient	Moisturizes skin; creates smooth texture; plant-derived	Generally well-tolerated; minimal concerns
Glycerin	Humectant	Attracts and retains moisture; prevents dehydration; soothes skin	Generally well-tolerated; beneficial for most skin types
Glycyrrhetic Acid	Antioxidant, anti-inflammatory	Derived from licorice root; protects against UV-induced free radicals; supports DNA repair; soothes irritation	Generally well-tolerated; minimal concerns
Glycyrrhiza Inflata Root Extract (source of Licochalcone A)	Antioxidant, anti-inflammatory	Powerful antioxidant; reduces inflammation; neutralizes free radicals; protects deeper skin layers	Generally well-tolerated; minimal concerns
Sucrose Polystearate	Emulsifier	Helps blend oil and water phases; stabilizes formula; mild emulsifier	Generally well-tolerated; minimal concerns
Sodium Stearoyl Glutamate	Emulsifier	Mild, skin-friendly emulsifier; derived from natural amino acids	Generally well-tolerated; minimal concerns
Hydrogenated Polyisobutene	Emollient, viscosity controller	Controls product thickness; creates smooth application	Generally well-tolerated; minimal concerns
Xanthan Gum	Thickener, stabilizer	Natural polysaccharide; stabilizes formulation; improves texture	Generally well-tolerated; minimal concerns
Sodium Hydroxide	pH adjuster	Balances pH to make product skin-compatible	Can be irritating in high concentrations, but used in small amounts for pH adjustment only

Ingredient	Function	Benefits	Potential Concerns
Sodium Chloride (Salt)	Viscosity modifier	Controls thickness of formulation; natural mineral	Generally well-tolerated; minimal concerns
Trisodium EDTA	Chelating agent	Improves product stability; prevents degradation	Generally well-tolerated in skincare; environmental persistence concerns
Caprylyl Glycol	Preservative enhancer, moisturizer	Antimicrobial properties; boosts preservative effectiveness; skin conditioning	Generally well-tolerated; minimal concerns
Hydroxyacetophenone	Antioxidant, preservative	Protects formula from oxidation; preservative functions	Generally well-tolerated; minimal concerns
Phenoxyethanol	Preservative	Protects against microbial contamination; ensures product safety	Potential sensitizer for some individuals; generally considered one of the gentler preservatives

Key Active Ingredients

UV Filters System

The sunscreen employs a sophisticated combination of five complementary chemical (organic) UV filters that work together to provide comprehensive protection:

UV Filter	Protection Type	Properties
Butyl Methoxydibenzoylmethane (Avobenzone)	UVA	Provides broad UVA protection, particularly effective against longer UVA wavelengths
Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine (Tinosorb S)	Broad-spectrum (UVA/UVB)	Highly photostable and enhances overall UV protection
Ethylhexyl Triazone (Uvinul T 150)	UVB	Highly effective and photostable UVB filter
Diethylamino Hydroxybenzoyl Hexyl Benzoate (Uvinul A Plus)	UVA	Photostable UVA filter that complements Avobenzone
Phenylbenzimidazole Sulfonic Acid (Ensulizole)	UVB	Water-soluble UVB filter that helps reduce greasy feel

Antioxidant Complex

Licochalcone A

- **Source:** Extract from the roots of the Chinese licorice plant (Glycyrrhiza Inflata)

- **Benefits:**

- Powerful antioxidant that neutralizes free radicals caused by UV and HEVIS light
- Anti-inflammatory properties that soothe sensitive skin
- Helps protect skin cells in deeper epidermal layers
- Reduces redness and irritation associated with sun exposure
- Research suggests it may help prevent photo-aging

Glycyrrhetic Acid

- **Source:** Derived from the roots of the licorice plant (*Glycyrrhiza Glabra*)

- **Benefits:**

- Antioxidant properties protect against UV-induced free radicals
- Supports the skin's own DNA repair mechanisms
- Anti-inflammatory effects that help reduce irritation
- Complements Licochalcone A for comprehensive skin protection

Formulation Highlights

Texture & Application

- **Format:** Spray dispenser for easy application, especially on hard-to-reach areas
- **Consistency:** Lightweight, fast-absorbing formula
- **Finish:** Non-greasy, transparent finish that doesn't leave white residue
- **Sensory profile:** Light, quick-drying texture suitable for body application

Skin Compatibility

- **Dermatologically tested** on sensitive skin
- **Non-comedogenic** (doesn't clog pores)
- **Fragrance-free** formulation reduces risk of allergic reactions
- **Alcohol content** helps with quick drying but may be potentially drying for very dry skin

Clinical Evidence & Efficacy

Protection Standards

The product meets and exceeds European recommendations for UVA and UVB protection:

- **UVB (SPF) Testing:** Follows ISO 24444:2019 standard for SPF determination
- **UVA Protection:** Meets the EU recommendation that UVA protection should be at least 1/3 of the SPF value

- **Critical Wavelength:** Exceeds the requirement of having a critical wavelength of at least 370 nm

Sensitive Skin Benefits

- **Anti-inflammatory ingredients:** Clinically shown to reduce UV-induced redness and inflammation
- **Free radical protection:** The antioxidant complex neutralizes reactive oxygen species (ROS)
- **Minimal irritant potential:** Formula designed to minimize allergic reactions

Usage & Application

Recommended Application

- Apply generously before sun exposure
- Recommended amount: approximately 2 mg/cm² of skin surface
- For an average adult body, approximately 30-40 ml (about 6-8 teaspoons) is required for adequate protection
- Reapply every 2 hours, especially after swimming, toweling, or excessive sweating

Sun Protection Guidelines

- Even with SPF 50+, it's recommended to:
 - Avoid the midday sun (10am-2pm)
 - Wear protective clothing where possible
 - Reapply sunscreen regularly
 - Keep babies and young children out of direct sunlight

Sustainability Features

Packaging

- **95% recycled plastic bottle** reduces environmental impact
- **Green leaf logo** indicates environmentally conscious formulation
- Follows Beiersdorf's sustainability initiative

Environmental Considerations

- Chemical filters rather than mineral filters (zinc oxide/titanium dioxide)
- No known reef-damaging oxybenzone or octinoxate in the formula
- Part of Eucerin's effort to reduce ecological footprint while maintaining clinical efficacy

Comparison to Similar Products

Advantages Over Competitors

- Higher percentage of recycled packaging than industry average
- Comprehensive protection against UVA, UVB, and HEVIS light
- Advanced antioxidant complex specific to Eucerin
- Formulated specifically for sensitive skin with anti-inflammatory benefits
- Medical skincare positioning with dermatological testing

Potential Limitations

- Contains alcohol which may be drying for some skin types
- Chemical filters may not be preferred by those seeking "natural" or mineral sunscreens
- Slightly higher price point compared to mass-market alternatives

Value & Pricing

- Positioned as premium medical skincare product
- Price reflects specialized formulation for sensitive skin
- Cost per application is reasonable considering the high protection factor and specialized ingredients

Target Consumer

- Individuals with sensitive skin prone to irritation from sun exposure
- Those seeking very high protection with added antioxidant benefits
- Environmentally conscious consumers who value sustainability initiatives
- Users looking for lightweight, non-greasy texture in a convenient spray format

Conclusion

Eucerin Sun Body Sensitive Protect Spray SPF 50+ is a scientifically advanced sunscreen that offers comprehensive protection against multiple types of damaging light radiation. Its formulation balances high efficacy with good cosmetic elegance and sensitive skin compatibility. The addition of potent antioxidants from licorice root extracts provides benefits beyond basic UV protection, while the spray format offers convenient application for large body areas.

The product represents Eucerin's dedication to medical skincare with environmental consciousness, as evidenced by its 95% recycled packaging. While it comes at a premium price point compared to basic sunscreens, the comprehensive protection and specialized formulation for sensitive skin justify the investment for those with particular sun protection needs.
