Why Choose Toxic-Free Toothpaste?

Conventional toothpastes often contain ingredients that may have adverse health effects:

- **Sodium Lauryl Sulfate (SLS)** - Can cause irritation and canker sores
- **Artificial Sweeteners and Dyes** - Linked to behavioral issues and allergic reactions
- **Triclosan** - A Potential endocrine disruptor banned in many products
- **Parabens** - May disrupt hormone function
- **Heavy Metals** - Contaminants found in many conventional brands

Toxic-free alternatives use natural ingredients that can be equally effective while avoiding potentially harmful chemicals.
