

Easy Expense Market Brief

Executive Summary

Easy Expense is an all-in-one expense management app that automatically scans receipts, tracks mileage, and creates expense reports for small businesses and individuals. The platform leverages AI to extract data from receipts, categorize expenses, and generate tax-compliant reports. The company claims to have found over \$500 million in tax deductions and reimbursements for users. Users reportedly find an average of \$15,245 in tax deductions and reimbursements annually.

The app offers three pricing tiers: a limited free plan, an unlimited individual plan, and a business plan supporting up to 5 users. Key features include receipt scanning with OCR, automated mileage tracking via GPS, bank account integration, email receipt processing, and export capabilities to PDF, Excel, and CSV formats. The platform targets small business owners, self-employed individuals, and teams requiring expense management and tax optimization.

Quick Answers

What can be found on it? Easy Expense provides receipt scanning with AI-powered data extraction (vendor, total, tax, date, payment method), automatic mileage tracking, bank/credit card integration, email receipt processing, and comprehensive reporting in PDF and Excel formats.

What is it good for? The platform is designed for small business owners and self-employed individuals seeking to maximize tax deductions, maintain audit-ready records, and streamline expense reporting processes. It automatically categorizes expenses for tax purposes and provides cloud backups for compliance.

Why do we need it? The app addresses the common problem of lost receipts that can cost hundreds in missed tax deductions or reimbursements. It helps users stay compliant and audit-ready while potentially saving an average of \$2,192 per year on taxes.

Deep Dive

Overview

Easy Expense is a cloud-based expense management solution focusing on automated receipt processing and tax optimization for small businesses. The platform combines mobile receipt capture with AI-powered data extraction and GPS-based mileage tracking.

Features/Specifications

Core Features:

- AI-powered receipt scanning with automatic data extraction (vendor, amount, tax, date, payment method)
- Smart receipt cropping and automatic cloud backups
- GPS-based automatic mileage tracking with \$0.67 per mile deduction rates
- Bank account and credit card integration for transaction scanning
- Email receipt processing via Gmail integration or forwarding to upload@easy-expense.com
- Professional PDF and Excel report generation
- CSV data export capabilities

Versions

Three pricing tiers available:

- Free Plan: 10 receipt scans per month, 2 expense reports per month, manual tracking and data export
- Individual Plan: Unlimited receipt scanning, unlimited expense reports, 7-day free trial
- Business Plan: All individual features plus ability to invite up to 5 users, free sole proprietor tax filing, unlimited workspaces

Integrations

- Gmail account integration for automatic email receipt scanning
- Bank account and credit card connections
- Email forwarding system for receipt processing

Pricing

- **Free Tier:** 10 scans/month, 2 reports/month, manual tracking always free
- **Individual Plan:** Pricing not publicly disclosed, 7-day free trial available
- **Business Plan:** Pricing not publicly disclosed, supports up to 5 users

Privacy/Security

Data Storage: Automatic cloud backups mentioned **Encryption:** Not publicly disclosed

Compliance: Designed to maintain audit-ready records and tax compliance

Setup Steps

1. Sign up at app.easy-expense.com
2. Download mobile app for receipt scanning

3. Connect Gmail account for email receipt processing
4. Link bank accounts and credit cards
5. Set up automatic mileage tracking with GPS

Traction

Sales: Not publicly disclosed **Funding:** Not publicly disclosed **Partnerships:** Not publicly disclosed
Users: Claims to have found over \$500 million in tax deductions across user base

Pros & Cons

Pros	Cons
AI-powered receipt data extraction	Limited free tier (10 scans/month)
Automatic mileage tracking via GPS	Pricing not transparently disclosed
Bank/credit card integration	Business plan limited to 5 users
Email receipt processing	No enterprise-level features
Multiple export formats (PDF, Excel, CSV)	No API or advanced integrations
Tax optimization focus	Limited compliance certifications disclosed
7-day free trial available	No offline functionality mentioned

Competitors

1. **Expensify** - Expensify Inc. | Full-featured expense management with SmartScan receipt processing and corporate card integration | Features: Advanced approval workflows, real-time expense policies | Free plan available, paid plans from \$5/user/month | expensify.com

Mileage Tracking	GPS auto	Manual/GPS	Manual	Manual	Manual	Varies
Bank Integration	Yes	Yes	Yes	Limited	Yes	Varies
Tax Optimization	Primary focus	Available	Via accountants	Available	Basic	Varies
Multi-user	5 max	Unlimited	Unlimited	Limited	Unlimited	Varies
Offline Mode	Not specified	Yes	Limited	No	Limited	Varies
API Access	No	Yes	Yes	Limited	Yes	Varies

Decision Guide

Recommendations by Persona

Student: Easy Expense free tier (10 scans/month) or Zoho Expense free plan for basic expense tracking and tax preparation.

Journalist: Expensify free plan for receipt scanning with potential upgrade for advanced features and integrations.

Clinician: Easy Expense individual plan for medical expense tracking and mileage deduction optimization.

Founder: Expensify or Easy Expense business plan depending on team size - Easy Expense for under 5 users, Expensify for larger teams.

Sales Professional: Expensify for comprehensive travel and entertainment expense management with approval workflows.

Red Flags

Legal Consent: Ensure proper employee consent for GPS mileage tracking and bank account integration.

Device/Battery: Automatic GPS tracking may impact mobile device battery life significantly.

Privacy: Limited transparency on data encryption, storage location, and third-party data sharing policies.

Implementation Tips

Practical Setup

1. Start with free tier to evaluate receipt scanning accuracy
2. Take advantage of 7-day free trial for full feature evaluation

3. Configure mileage rates to match current IRS standards (\$0.67/mile for 2024)
4. Set up email forwarding rules for automatic receipt processing
5. Establish regular backup export routine

Receipt Capture Best Practices

- Ensure receipts are well-lit and fully visible
- Capture receipts immediately after transactions
- Use smart cropping feature for optimal data extraction

Backup/Export Strategy

- Leverage automatic cloud backup feature
- Export data regularly to PDF, Excel, or CSV formats
- Maintain local copies of critical expense reports for audit purposes
